EXECUTIVE SUMMARY

Senior Frontend Engineer with 7+ years of experience building scalable enterprise web applications using React.js, TypeScript, JavaScript, and Angular. Experienced in frontend architecture, reusable component development, state management with Redux and Zustand, REST API integrations, and AWS-based application delivery. Delivered administration platforms, AI-powered application interfaces, and real-time web applications across enterprise and healthcare domains. Experienced in cross-functional collaboration, frontend performance optimization, code quality, and CI/CD workflows.

FUNCTIONAL EXPERTISE

- **React + Angular Mastery**
- **Enterprise-Scale Frontend**
- **CI/CD & DevOps Practices**
- **AI-Driven UI Engineering**
- **Git & Team Collaboration**
- **Managing Team**

FUNCTIONAL EXPERTISE DEMONSTRATED

Bounteous

November 2024 - October 2026

Bounteous is a digital transformation and consulting company. Worked on a client engagement with EAB, supporting its Marketing Applications platform used by EAB teams and partner colleges for instance configuration, AI-powered student engagement, data delivery, email operations and marketing workflows.

Senior Software Engineer

Developed and enhanced enterprise-grade React and TypeScript applications across EAB's Marketing Applications ecosystem, delivering new product features, AWS deployments, reusable frontend architecture, testing improvements and shared engineering standards across multiple applications.

- **React Application Architecture:** Developed the Symphony administration UI for Emailify webhook configuration, including tenant directories, webhook generation, secure secret handling and reusable configuration workflows.
- **AI-Powered UI Engineering:** Developed the AI SMS Assistant configuration console with global settings, NavAI field mapping, tenant campaign mapping and Acquia Campaign Studio integration.
- **Enterprise Frontend Development:** Delivered administration workflows for managing tenants, operating units, credentials, service configuration, permissions and unsaved-change protection within Instance Metadata Manager.
- **AWS & Cloud Integration:** Worked with AWS SAM, CloudFormation, Lambda, ALB, S3, DynamoDB, Route 53, IAM, Cloud Watch, Secrets Manager, Security groups and KMS to

support application deployment and developer-specific environments.

- **CI/CD & DevOps Practices:** Standardized ESLint 9, Prettier, TypeScript validation and GitLab CI/CD pipelines across multiple Marketing Applications repositories.

RWS Group

July 2022 – October 2024

RWS Holdings plc (LSE: RWS) is a global leader in AI-driven language solutions and software services, RWS Group partners with AWS, Meta, and University of Manchester, serving 9,000+ employees worldwide with £718.2M revenue.

Software Developer

Leads front-end development for enterprise React.js applications, collaborating with stakeholders, optimizing performance and delivering scalable UI solutions for high-impact global projects.

- **React & JavaScript Development:** Led front-end development of **HAI Go Global**, a multilingual React.js platform, driving performance, modular architecture and real-time API integration.
- **Managing Teams:** Coordinated cross-functional teams (UI/UX, backend, PMs) to align product goals and engineering execution.
- **TypeScript & Clean Code:** Migrated legacy JavaScript apps to React + TypeScript for **Business Standard**, reducing runtime errors by 30% and enhancing code maintainability.
- **CI/CD & DevOps Practices:** Enforced Git-based workflows and CI/CD practices within a 25-member team, accelerating deployments and resolving conflicts efficiently.
- **State Management (Redux):** Architected Redux-based state management, improving UI responsiveness and reducing re-renders by 40%.

XBREYINS (Formerly Extended WebApp tech)

August 2019 - June 2022

A software firm specializing in React/React Native development with ~90 employees delivering global digital solutions.

Software Engineer

Developed high-performance React.js & React Native applications, leading front-end architecture, integrating real-time collaboration tools and working with clients to deliver cross-platform solutions.

- **React & JavaScript Development:** Designed and delivered the front-end architecture of a real-time NBA strategy app, enabling player-coach collaboration via an interactive whiteboard.
- **Team Management:** Collaborated directly with product teams and NBA stakeholders to shape UX and technical delivery.
- **Git & Team Collaboration:** Led Git workflows and CI/CD processes within a 15-member team, ensuring seamless deployment cycles.
- **Backend:** Integrated Firebase and Socket.io for real-time sync, reducing latency and enhancing cross-device user experience.

EDUCATION

Bachelor of Technology (Computer Science Engineering). Medi-Caps University (Indore,India)

- CGPA : 8.0
